Priority Overview

Tier	Count	Description
CRITICAL	0	Requires immediate investigator action
HIGH	1	High-priority review recommended
MEDIUM	9	Review within normal workflow
LOW	0	Low urgency — monitor for escalation
INFORMATIONAL	8	Background context record

Top Priority Results

Tier	Score	Target	Explanation
HIGH	66.9	ACTIVITY	Activity priority based on detection and context.
MEDIUM	57.0	ARTIFACT	Artifact priority based on direct forensic observations.
MEDIUM	54.0	ARTIFACT	Artifact priority based on direct forensic observations.
MEDIUM	54.0	ARTIFACT	Artifact priority based on direct forensic observations.
MEDIUM	51.0	ARTIFACT	Artifact priority based on direct forensic observations.
MEDIUM	51.0	ARTIFACT	Artifact priority based on direct forensic observations.
MEDIUM	51.0	ARTIFACT	Artifact priority based on direct forensic observations.

Tier	Score	Target	Explanation
MEDIUM	50.7	ACTIVITY	Activity priority based on detection and context.
MEDIUM	42.0	ARTIFACT	Artifact priority based on direct forensic observations.
MEDIUM	40.0	ARTIFACT	Artifact priority based on direct forensic observations.

Triage Disclaimer

This report summarises the current forensic triage results produced by ForensiQ. Detection, anomaly, correlation, and prioritisation results are analytical outputs for investigator review and do not by themselves establish malicious intent, attribution, guilt, or legal conclusions. All findings should be verified by a qualified investigator before being used as the basis for any legal, disciplinary, or enforcement action.
